

Notice of change in package design "Meni-One Eye II" series

We changed the package design "Meni-One Eye II" series to make it easier to understand what kind of effect can be expected since we have been receiving the opinions that it is difficult to distinguish each product.

The new packages will be distributed after the current packages have been run out. The timing of changing will differ from each product so both current and new packages will be distributed to the market.

Thank you for your kind understanding and continuous supports.
